

## CAWG Projects

Vineyards and Wildlife Habitat- This action plan addresses concerns with vineyards and wildlife habitat.

Pest Management Alliance - The Winegrape Pest Management Alliance, a grower-driven partnership with the Department of Pesticide Regulation and the United States Environmental Protection Agency to promote reduced-risk pest management.

Sustainable Winegrowing Program - This project represents a voluntary self-assessment tool with information on how to conserve natural resources, protect the environment and enhance relationships with employees, neighbors and local communities.

Good Neighbor & Community Relations - This guidebook aims to help winegrape growers, vintners and regional associations take a proactive, collaborative approach to environmental and social challenges.
